Cloud Computing Platform Market Overview

545.8 USD BILLION
2022

1,240.9 USD BILLION
2027

CAGR of
17.9%

The global cloud computing market is projected to be valued at USD 1,240.9 billion by 2027, growing at CAGR of 17.9% during the forecast period.

The market growth can be attributed to the growing adoption of cloud computing and related technologies, globally.

Acquisitions and product launches would offer lucrative opportunities for market players in the next five years.

Increased automation and agility are expected to drive the cloud computing market.

Rise in the number of SMEs to create new revenue opportunities for cloud vendors and increase in the adoption of hybrid cloud services are expected to provide growth opportunities for the vendors in the cloud computing market.
